School of Marine Science and Ocean Engineering

STUDENT FUNDING ANNOUNCEMENT

The William R. Spaulding Marine Program Endowment in Support of Marine Biology Research at the Jackson Estuarine Laboratory

Funding is available to support one (1) UNH student with their marine biology research at the Jackson Estuarine Laboratory. Both undergraduates (junior or senior standing) and graduate students are eligible to apply. The successful applicant will receive an award up to \$1,500.

The Anderson Family Undergraduate Endowment for Marine Biomedical Studies

This endowment was established through the generosity of Dr. Herbert R. Anderson, Jr. '48 in memory of his wife, Marjorie, and his daughter, Kristin. Funding is available to support one (1) UNH undergraduate student undertaking biomedical research investigating human health using marine organisms as models. Undergraduate students (junior or senior standing) are eligible to apply. The successful applicant will receive an award up to \$1,200.

Application deadline for both opportunities is February 24, 2017.
